NEXTREME NAMES JOHN GOEHRKE AS CEO

DURHAM, N.C. (October 11, 2010) — Nextreme Thermal Solutions, the leader in microscale thermal and power management products for the electronics industry, today announced that John Goehrke has joined the company as Chief Executive Officer.

Mr. Goehrke brings over 25 years of sales, marketing, and general management experience to Nextreme. Most recently, he was CEO of siXis Inc., pioneers of advanced Silicon Circuit Board (SiCB) technology, and COO of Luna Innovations, where he was part of the executive management team that successfully completed an Initial Public Offering of the company in June, 2006. Previous to Luna Innovations, Mr. Goehrke was CEO of Luna Technologies, a VC funded start-up, where he led the company to profitability and a successful exit in the form of an acquisition. Before joining Luna, Mr. Goehrke was General Manager of Acterna's Access Division, based in Germantown, MD, and the Fiber Optics Division based in St. Etienne, France.

Mr. Goehrke began his career in sales and marketing for American Photonics, a VC funded start-up, which was successfully sold to Siecor Fiberlan. He earned his B.S. in Electrical Engineering from the University of Connecticut and M.B.A. from the University of Pittsburgh.

"I am delighted to welcome John to the Nextreme team," said Rich Harris, chairman of Nextreme's board of directors and managing general partner at Redshift Ventures. "John's track record in high-tech marketing, sales, and operations makes him well suited to lead the company going forward.

Nextreme uses its breakthrough thin-film thermoelectric technology to produce discrete and integrated cooling and power generation devices. Contact Nextreme at 3908 Patriot Dr., Suite 140, Durham, NC 27703-8031; call (919)-597-7300; e-mail info@nextreme.com; or go to www.nextreme.com.

About Nextreme Thermal Solutions™, Inc.

Nextreme Thermal Solutions offers electronics cooling and energy harvesting solutions for telecommunications, semiconductor, consumer, medical, aerospace and government markets. The company uses microscale thermoelectric technology and high-volume semiconductor manufacturing processes to address the growing needs for advanced thermal management and clean-energy solutions world-wide. Nextreme also offers sophisticated modeling, design, engineering, and contract manufacturing services to deliver fully-optimized solutions from standard and customized products that solve the most challenging thermal and power management issues. Nextreme's headquarters and manufacturing facility are based near Research Triangle Park, North Carolina. Visit www.nextreme.com.
